

ENCORE® Latex Underglove

SURGICAL GLOVES

Latex, powder-free surgical green underglove for effortless double gloving

Featuring Ansell's proprietary HYDRASOFT™ Technology, this latex glove combines the advantage of a colored underglove with the added benefit to retain moisture and rehydrate skin, keeping the skin moist and supple to maintain its natural barrier function. The low friction external finish enables the outer glove to glide on effortlessly, while its thin design offers optimal comfort when double gloving.

KEY FEATURES & BENEFITS

- Contains glycerol and dimethicone as moisturizing agents to help retain moisture and rehydrate skin
- Low-friction outer-surface finish offers effortless donning and optimal comfort when double gloved
- Green color for easy identification of a glove breach
- The DERMASHIELD™ Technology internal coating together with the built-in moisturizer, facilitates dry and damp donning as well as intra-operative changes

CAUTION: Safe use of these gloves by latex-sensitized individuals has not been established. This product contains natural rubber latex, which may cause allergic reactions.

RECOMMENDED FOR

- All surgeries, especially high risk procedures in orthopedics, trauma, and cardiac
- Damp donning
- Easy identification of a glove breach
- Use as an underglove when double gloving

FEATURED TECHNOLOGIES

HYDRASOFT™
Moisturizing Technology

SUREFIT™
Cuff Roll-down Technology
