Accelerate^{OR}

BOA #: VA119-17-G-0092

The fastest way to turn over your O.R.

Reduce O.R. Turnover Time. Promote Patient Safety

Bosma Medical's Accelerate•OR Kits contain an assortment of disposable linens, bags and mop heads used after a procedure to set-up the O.R. suite for the next case. Accelerate•OR helps you conquer some of your largest O.R. challenges by helping you:

Boost Efficiency

Accelerate•OR Kits contain everything you need to set up the O.R. suite and achieve best practice turnover times that allow you to perform more procedures and treat more patients in the same amount of time.

Promote Safety

Accelerate•OR Kits are single use and discarded after the procedure, reducing the risk of cross contamination, and supporting AORN recommendations. Products include, but are not limited to, an absorbent O.R. table sheet—that works to help keep the patient dry and comfortable.

Lower Costs

Accelerate•OR Kits let you order exactly what you need, so there's less waste—helping to eliminate laundering costs, as well as replacement costs for linens and O.R. table pads.

The Impact of Hospital-acquired Pressure Ulcers in the O.R.

As regulatory standards and penalties continue to evolve, it's imperative that we evolve even faster. With the Accelerate•OR Program, we're setting a new standard for skin maintenance—improving education and advancing outcomes with products that protect and preserve skin. Our Accelerate•OR Kits include innovative products that can help.

Hospital stays increase an average of

9.5 DAYS

for surgical patients with pressure ulcers.¹

The average estimated cost of treating a pressure ulcer is

\$43,000²

The annual cost of treating pressure ulcers is as much as

\$1.5 BILLION¹

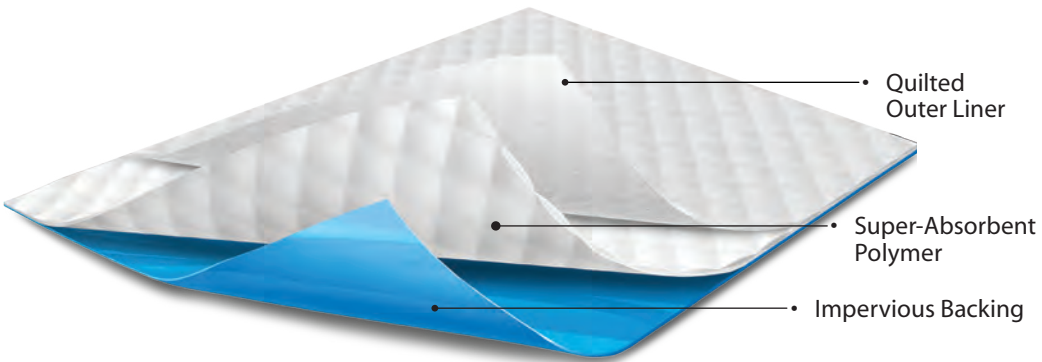

The annual number of deaths associated with pressure ulcers is

60,000²

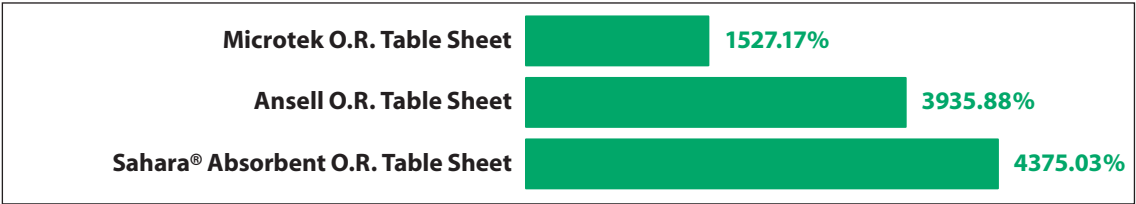

Reduce Moisture: Sahara® Absorbent O.R. Table Sheet

Excessive moisture is one of the major causes of O.R.-related pressure ulcers. But tests show that the Sahara® Absorbent O.R. Table Sheet absorbs 4375.03% its mass or over 7 liters of fluid³—helping reduce the risk through moisture management.

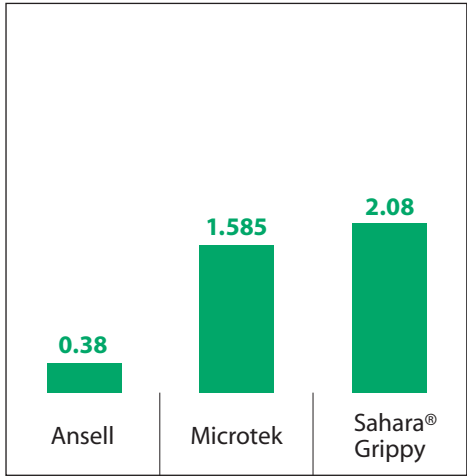

- Core polymer technology rapidly wicks moisture away, maintaining skin integrity
- Measures 40 x 90" (101.6 cm x 228.6 cm) for full O.R. table coverage
- Quilted for smooth surface
- Disposable design creates low risk for harboring bacteria
- Radiolucent
- Sahara® Grippy is ideal for surgical procedures that require a tilted position

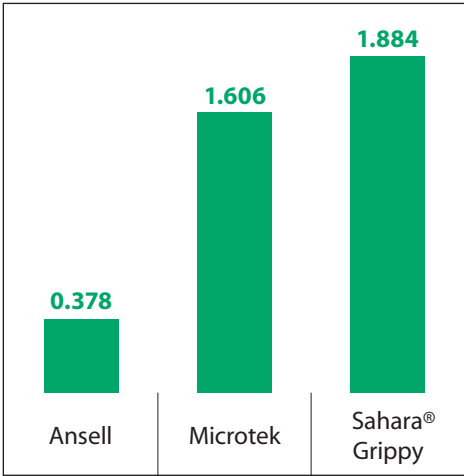

Liquid Absorption Capacity (ISO 9073-6): Sahara® Absorbent O.R. Table Sheet vs. Competitors³
% mass water absorption compared to specimen mass

Every Minute Counts in O.R. Turnover Time

Accelerate•OR Clean-Up Kit improves your facility’s turnover time, which can increase more valuable clinical care time and procedures performed. By reducing inefficiencies, you can improve financial results by increasing revenue and eliminating overtime pay.

Convert lost time into improved patient care¹

Improve turnover time to regain important O.R. case time that otherwise goes wasted.

Time is money²
Each minute of wasted O.R. time costs an average of

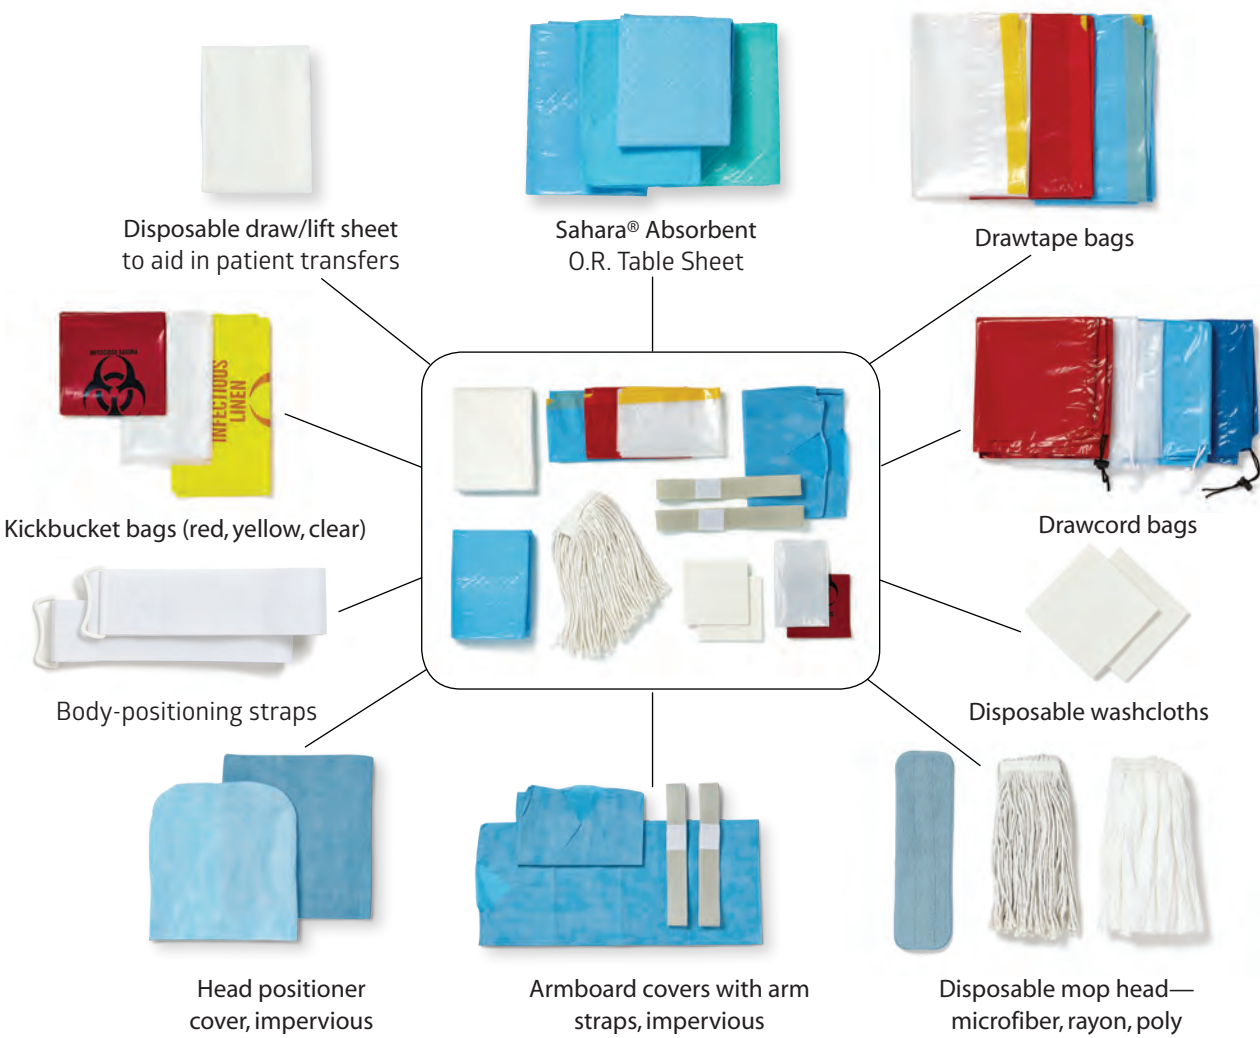

\$60-100

Room for improvement¹
The average O.R. turnover time is 31.5 minutes, yet practices suggest it be 15 minutes.

Customize Your QuickSuite O.R. Clean-up Kits

Every facility has unique needs, and Bosma Medical lets you customize your kits for maximum efficiency—with the products you need most. Just choose among the following components, or add your own. We’ll assemble and deliver them whenever and wherever you need them, all with one item ordering number.

Kits are not limited to the items above. Talk to your BOSMA rep about what you can include in your Custom Kit.

Advance Your O.R.

Promote Safety

Lower the risk of cross contamination with Sahara® Absorbent O.R. Table Sheets.

Improve Efficiency

Reduce the time it takes to turn over your O.R. with easy, customizable kits.

Reduce Costs

Eliminate waste with custom kits and avoid the associated costs of reusable linens.
