

REBOUND® DIABETIC WALKER

Effective, safe and compliant
support of foot ulcer treatment

With 1 in 4 VA patients suffering from diabetes¹ and 15%² of them at risk of developing a diabetic foot ulcer, the need to maximize successful outcomes in Diabetic Ulcer Healing to minimize the risk of amputations is more important than ever before. Current guidelines recommend off-loading to increase the likelihood of diabetic foot ulcer healing²

The Rebound Diabetic Walker is uniquely designed for effective treatment of plantar foot ulcers. It enables easy access and re-fitting during wound care, while improving the patient's mobility during the healing process.

REBOUND DIABETIC WALKER

Effective, safe and compliant support of foot ulcer treatment

1. EASY PNEUMATIC SYSTEM FOR SAFETY AND COMFORT

Rebound Diabetic Walker is equipped with a pneumatic system that includes a pressure relief valve to maintain pressure in the bladder below the diastolic blood pressure.

2. IMMOBILIZATION & PROTECTION

The Rebound Diabetic Walker's hard outer shell minimizes shear forces by immobilizing the foot and ankle at 90°. A toe protection bumper keeps toes safe while Össur's patented Flex Edge® overmolding prevents pressure points and can be easily trimmed and cut to allow for an expandable shell.

3. EVEN PRESSURE DISTRIBUTION

The Rebound Diabetic Walker tri-laminate insole consists of removable independent hexagonal pieces that work collectively to adjust and react to forces under the plantar surface of the foot. The removable pieces are designed to offload the ulcer, while the heat moldable Plastazote layer, evenly distributes the pressure and minimizes friction.

4. INCREASED PATIENT COMPLIANCE

Rebound Diabetic Walker includes tamper evident strapping for compliance monitoring.

5. NATURAL GAIT

The rocker bottom outsole of the Rebound Diabetic Walker is designed for a smooth roll over.

SIZE	ITEM #	PRICE
S	10 -242500002 DS	\$179
M	10 -242500003 DS	
L	10 -242500004 DS	
XL	10 -242500005 DS	

FUNCTIONAL HEALING™ - WHERE MOBILITY MEANS RECOVERY

Our expertise in Injury Solutions has driven us to take the next step forward by developing indication-specific products which are designed to optimize healing while maintaining function and mobility.
